EMSystems® Hosts its 9th Annual Emergency Preparedness Conference

Health & Human Services, National Disaster Medical System and Center for Disease Control will present at this year's conference

MILWAUKEE, WI: (September 21, 2009) – EMSystems will host its annual user conference to more than 100 attendees this week. This year's conference will feature speakers from Health & Human Services (HHS), National Disaster Medical System (NDMS) and Center for Disease Control (CDC). Major topics include H1N1 tracking and response management, disaster preparedness, public health alerting, and patient tracking. More than 21 states will be represented by emergency preparedness organizations, state and local health departments, hospitals, and emergency response teams.

Serving more than 70% of the nation's population, EMSystems' solutions are used by thousands of hospitals, EMS providers, fire departments, law enforcement agencies and state/local departments of health.

"It is an honor to have representatives from HHS, NDMS, and CDC presenting at this year's conference. Along with colleagues from around the country, these industry experts will offer crucial perspectives that define and support national emergency preparedness and response strategies," states Andy Nunemaker, CEO, EMSystems.

"Our clients are on the front lines of any disaster or medical emergency," explains Nunemaker.

"EMSystems' solutions strengthen information sharing and transform the way emergency management teams collaborate on a daily basis, during mass casualty incidents, public health emergencies, and large scale events."

Highlighted topics include H1N1 preparation and response, pandemic surveillance, hospital evacuation, and public health alert management. In addition, EMSystems clients will develop new ideas, share best practices, and collaborate for innovation in emergency preparedness and response.

The EMSystems User Conference is held September 23 – 25th at the Intercontinental Milwaukee Hotel.

About EMSystems

EMSystems, LLC is a recognized leading provider of comprehensive and interoperable technology solutions for emergency preparedness and response within the healthcare continuum. Serving more than 70% of the nation's population, EMSystems' solutions are used by thousands of hospitals, EMS providers, fire departments, law enforcement agencies and state/local departments of health. These comprehensive solutions improve real-time communications, multi-media alerting, inventory resource allocation, volunteer registry management, patient and evacuee tracking, and pre-hospital patient care records to enhance emergency preparedness and response to medical emergencies, mass casualty events, and public health incidents. EMSystems is headquartered in Milwaukee, Wisconsin. Additional information is available at www.emsystems.com.
